

TOGETHER FOR EQUAL TEACHING OPPORTUNITIES

OUR CAUSE, PROJECT AND HOPE

Millions of students across the Under developed countries cannot benefit fully from a traditional educational program because they have a disability that impairs their ability to participate in a typical classroom environment. For these students, computer-based technologies can play an especially important role. Not only can computer technology facilitate a broader range of educational activities to meet a variety of needs for students with mild learning disorders, but adaptive technology now exists than can enable even those students with severe disabilities to become active learners in the classroom alongside their peers who do not have disabilities.

This project promotes the role computer technology and promoting the education of children with special needs within the regular classroom. For example, use of computer technology for word processing, communication, research, and multimedia projects can help the three million students with specific learning and emotional disorders keep up with their nondisabled peers. Computer technology has also enhanced the development of sophisticated devices that can assist the two million students with more severe disabilities in overcoming a wide range of limitations that hinder classroom participation—from speech and hearing impairments to blindness and severe physical disabilities. However, many teachers are not adequately trained on how to use technology effectively in their classrooms, and the cost of the technology is a serious consideration for all schools. Thus, although computer technology has the potential to act as an equalizer by freeing many students from their disabilities, the barriers of inadequate training and cost must first be overcome before more widespread use can become a reality.

We seek to provide training for various EFL teachers in Algeria and the world to benefit for global training and webinars as promoting nonnative English speaking teachers and their role in providing an online platform to learning and teaching. We also organize annual virtual conferences and year-round webinars and presentations to connect teachers internationally.

If you support us, please subscribe to us and connect with us for an opportunity to bring face to face and online learning together into blended learning for the disadvantaged.
